

WATER AND WASTEWATER MASTER PLAN UPDATE

NOTICE OF PUBLIC INFORMATION CENTRE

Background

The Town of Tecumseh has prepared an Update to its Water and Wastewater Master Plan to review, confirm and update the preferred water and wastewater servicing strategies to adequately support projected growth and development within the Town, and to continue to provide a high level of service in the existing service areas.

This Master Plan Update builds upon information contained within the previous 2002 Water and Wastewater Servicing Master Plan, the 2005 amendment to the Water Servicing Plan, and the 2008 Update to the Water and Wastewater Master Plan. The recommendations of the previous Master Plan Update have been reviewed and evaluated with consideration to updated planning projections and studies, changes to the original assumptions, updated status on infrastructure projects and upgrades to existing infrastructure, and changes in proposed timing of projects recommended within the Master Plan.

The Water and Wastewater Master Plan Update has been completed in accordance with the Municipal Class Environmental Assessment (Class EA) – Approach 2 Planning Process for Master Plans. This process integrates planning for municipal infrastructure requirements with the principles of environmental assessment planning. In accordance with the master planning process, alternative water and wastewater servicing strategies have been evaluated based on an assessment of the natural environment, socio-cultural environment, economic and technical feasibility.

Public Consultation

Public and review agency consultation is a key element of the Master Plan process. The Town wants to ensure that anyone interested in the study has an opportunity to get involved and provide input. A Public Information Centre (PIC) will be held to solicit input from the public and interested groups on the study and the preliminary preferred water and wastewater servicing strategies. Representatives from the Town and its consultants will be present at the PIC to answer questions and discuss the next steps in the study.

Date: June 19th, 2018

Time: 3:00 to 5:00 pm, and 6:00 to 8:00 pm

**Location: Council Chambers, Town Hall
917 Lesperance Road, Tecumseh, Ontario, N8N 1W9**

You are encouraged to attend the PIC and provide your comments so that they may be included in the study. Comments received will be considered in finalizing the recommended water and wastewater servicing strategies. At the completion of the Master Plan Update process, a comprehensive Water and Wastewater Master Plan document will be prepared and filed for public review.

If you are unable to attend the PIC, we would still like to hear from you. Please contact either of the following individuals if you have any questions, or are interested in receiving further information on this project:

Phil Bartnik, P. Eng.
Director Public Works & Environmental Services
Town of Tecumseh
917 Lesperance Road
Tecumseh, Ontario N8N 1W9
